ABOUT ME

I have been working with software for 2 years, I have a command of the basic C# and Python languages and I aim to advance in this field. I am intensely working on improving myself in every area, from mastering game development and game engines to the process of publishing a game on platforms from its very beginning. I am turning my dream games into reality. In short, I have a command of every area in the mobile game section, from 0 to the end.

EXPERIENCE

- Mastery of all areas of the UNITY Game Engine
- Solution for frequently encountered errors
- Generating revenue from the game, ad integration
- A background in creating all types of games, especially 2D
- Teamwork

PROJECTS

Merge League

Merge League is a 2D mobile puzzle game that I have finished developing. In the game, which I developed by taking inspiration from the puzzle games that have been very popular in recent times, I aimed for it to be simple but retentive for the player.

EDUCATION

Nisantasi University

Computer Programming / 2024 -
